SUMMARY

First-year undergraduate at IIIT Hyderabad, pursuing a dual degree in Computer Science and Computing & Human Sciences. I have a strong interest in programming and technology, and I also love exploring questions about human behavior, psychology, and meaning. I care deeply about both domains — the precision of code and the richness of human behavior. With experience in Computer Science, and a longstanding interest in psychology and reflective writing, I bring curiosity, clarity, and a collaborative spirit to everything I do.
